

Language Translation Extensions User Manual

Installation

1. Clone the Extension:

- Open a terminal or command prompt on your computer.
- Run the following command to clone the extension repository:
- `git clone <repository_url>`
- Replace `<repository_url>` with the URL of the GitHub repository for the extension.

2. Open Chrome Extension Settings:

- Click on the three-dot menu in the top-right corner of the browser window.
- From the menu, go to "More tools" and select "Extensions."

3. Enable Developer Mode:

- In the Extensions page, ensure that the "Developer mode" toggle in the top-right corner is enabled.

4. Load the Extension:

- Look for an option like "Load unpacked extension" or "Install extension from folder" in the browser's extensions settings.
- Click on that option and navigate to the cloned extension directory.
- Select the extension directory and click "Open" to load it.

5. Verify Installation:

- After loading the extension, it should appear in the list of installed extensions.
- Ensure that the extension is enabled by checking the corresponding toggle/checkbox.

Usage

1. **Activate the Extension:**

- Open a web page with text in the source language (e.g., Tamil, Hindi, etc.) that you want to translate.
- Click on the extension's icon in the browser's toolbar to activate it.
- A slider or toggle button will appear on the screen.

2. **Enable Translation:**

- Slide the slider or toggle the button to the "ON" position to start the translation process.
- The extension will capture the source language text on the page and automatically translate it to the target language (e.g., Kannada etc.).

3. **Disable Translation:**

- To stop the translation process, slide the slider or toggle the button to the "OFF" position or refresh the page.
- The page will revert to displaying the original source language text.

4. **Uninstall the Extension (optional):**

- If you no longer need the extension, or to troubleshoot any issues:
 - Open the browser's extensions settings.
 - Locate the extension in the list of installed extensions.
 - Click on the option to remove or uninstall the extension.
